

Discovery Diagnostics

Build A Value-Ranked Automation Roadmap You Can Actually Execute

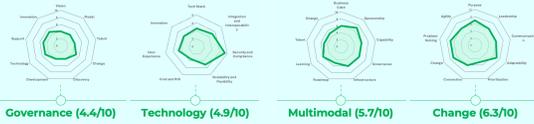

Most organizations do not have an automation idea problem. They have a decision problem. Which processes matter most, what is feasible, and what your organization is ready to deliver without scaling risk. The Discovery Diagnostic accelerates insight gathering so

you can move from ideas to a delivery-ready plan. We help you identify the highest-impact processes tied to your business objectives, assess readiness and feasibility, and produce a roadmap your teams can implement and maintain with confidence.

Ashling combines deep automation expertise with a really strong understanding of our business. They are proactive, well-prepared for every interaction, and translate complex technical concepts into clear, actionable recommendations.

– Group Solution Manager, Retail

What You Get

✓ AI + IA Readiness Assessment

A clear, practical readout of your readiness to deliver automation safely and at scale across four dimensions:

- ➔ IA Governance (CoE): roles, intake, prioritization, standards, and decision rights
- ➔ Change Management: adoption readiness, communications, training, and ownership
- ➔ Process: clarity, stability, exception patterns, and improvement potential
- ➔ Technology: data, integrations, security, environment readiness, and platform fit

✓ High-Level Architecture Review

A pragmatic review of your current-state architecture and constraints, plus guidance on what needs to be in place to support reliable delivery.

✓ Development Roadmap And Executive Readout

A value-ranked roadmap that connects objectives to a sequenced set of use cases, with an executive-ready narrative your leaders can fund, defend, and track.

Award-Winning Expertise

Discovery Diagnostics

Overview & Timeline

Week 00**Week 01****Week 02 - 04****Week 05****Week 06**

Educate

Provide education on agentic and automation to business and technical users with a focus on technical, business and value drivers.

Intake Survey & Top Process Evaluation

Capture key process details (overview, systems, time spent, issues) grounded in how work is actually done—enabling us to identify and qualify automation opportunities without bias.

Deep Dives (5 Processes)

Conduct five SME walkthroughs to confirm how the work happens, assess automation complexity and required capabilities. Perform valuations to establish value impacts and alignment with business objectives & goals.

Business Leader Consensus

Brief key leaders on early findings, build consensus, and confirm business value per use case to prioritize what moves forward.

Findings Report

Deliver a prioritized set of automation candidates and a leadership-ready roadmap of immediate recommendations and future opportunities.

**Prioritize processes
and prove value, fast.**
